PALOS

Fund Description

The Palos-Mitchell Alpha Fund (the "Fund") is an open-ended trust established on January 19, 2019. The Fund's objectives are to 1) protect capital and 2) deliver superior long-term returns by investing in a core portfolio of primarily large and mid-capitalization global equities.

The Fund is actively managed and uses a fundamental, thematic and price-event-driven approach. Additionally, hedging strategies may be employed to mitigate risk, increase convexity, or monetize volatility at the Manager's discretion. Since 2024, tail-risk mitigation strategies have also been implemented, leveraging expertise in derivatives and risk management to help protect the portfolio against adverse market conditions. The Fund favors North American-listed securities and U.S.-traded depository receipts (ADRs) to benefit from greater liquidity, time-zone alignment, and a strong regulatory framework.
